### One of the most asked question is WHAT SHOULD WE WEAR?

It's important to be in clothing that you feel comfortable in. You want to look back on these images in the years to come and feel you looked yourself. You also want to be able to display these images in your home.

It's nice if clothing can be co-ordinated, but this doesn't mean that you have to be to matchy matchy! Choosing a colour scheme and sticking to it is the easiest. I suggest choosing 3 or 4 colours that compliment each other and going with those colour tones. You can always add layers or accessories to add a pop of colour!

It is best to avoid logos or bold patterns. If one person has a patterned or striped outfit, try and limit others also having patterns that may clash. Below are some colour palates and ideas that may be helpful when selecting your outfits for your photo session.
